

ELMER'S CLEAN-UP TIPS

HOW CAN I UN-CLOG MY GLUE CAP – WHAT'S THE PROPER WAY TO CLEAN IT?

The glue caps can actually be taken apart to help remove any blockage. Simply open the cap as far as it will go and then pull the orange part straight up and it should “pop” off. This should allow you to easily access any blockage. The blockage can be cleared with something like a toothpick or paper clip. You can also soak these separated parts in room temperature water which should help to more easily free up any blockage. Once clear, the orange part can simply be pressed/snapped back into position.
